Description Details Take your games on the road with the ASUS 15.6" Republic of Gamers Zephyrus M GU502GU Gaming Laptop . Featuring an all-aluminum design, it's both lightweight and durable, and smaller than most standard 15.6" laptops. Without sacrificing performance for portability, it's equipped with a 2.6 GHz Intel Core i7-9750H six-core processor, 16GB of DDR4 RAM, a 512GB NVMe PCIe M.2 SSD, and an NVIDIA GeForce GTX 1660 Ti graphics card. With these powering the system, it can easily tackle everyday tasks and be used to play graphically demanding games on its 1920 x 1080 Full HD 144 Hz IPS display. Other integrated features include Wi-Fi 5 (802.11ac), Bluetooth 5, Gigabit Ethernet, USB Type-A and Type-C ports, HDMI connectivity, and audio in/out jacks. The operating system installed is Windows 10 Pro (64-Bit). NVIDIA GeForce GTX 10-Series Based on NVIDIA's Pascal architecture, the NVIDIA GeForce GTX 10-series graphics card provides major improvements in performance, memory bandwidth, and power efficiency over its predecessor, the Maxwell architecture. Design The RoG Zephyrus M is crafted with a magnesium-alloy chassis for durability. Moreover, it weighs roughly four pounds and measures just 0.7" thin, making it an easily portable gaming solution. Display The 15.6" display has thin bezels for an 81% screen-to-body ratio, which offers users a more immersive viewing experience. Furthermore, it's built with a Pantone-validated IPS-type panel for wide viewing angles and vivid colors with full sRGB coverage. As for gaming, it has a fast 144 Hz refresh rate and a 3 ms (GtG) response time. Cooling The Zephyrus M is equipped with powerful 12 V, 83-blade fans for efficient cooling. Users can also adjust their cooling profile for a balance between performance and noise. The self-cleaning system will also prevent dust buildup to ensure long-term cooling efficiency. USB Type-C Charging USB Type-C Power Delivery lets you charge the system with a portable battery pack, so you can travel lighter. see less
