

# Soundcraft 5031819.V Overview

*The **Soundcraft Dante Card** is a dual-port Cat 5 Dante option card that allows you to interface your Soundcraft Si Series console with other Dante-compatible devices. It features primary and secondary Dante ports on locking etherCON connectors to accommodate up to 64 channels of digital audio in each direction. DIP switches on the card enable reduction of the channel count and configuration of the clock source.*

## Compatible Consoles
