ng

A specially designed output stage drives difficult loads like excessively long cables without harming the signal quality. The C480 B offers a two-step high-pass filter and two gain stages of either -10dB or +6dB.

## Specs/ 2180H00150 General Specifications

Polar Pattern

Cardioid

Audio frequency bandwidth

20 - 20000 Hz

Preattenuation Pad

6; -10 dB

Bass cut filter

100 Hz

Recommended load impedance

2000 Ohms

Height

173 mm

Diameter

21 mm

Finish

matte black

Type

Balanced XLR

Gender

Male

Contacts

3-pin

Voltage

48 V
