The Targus Laser Pen Stylus for Capacitive Devices makes it easy to take notes, draw, play games or simply turn a page. This accessory not only functions as a stylus but also features as a built-in pen and laser pointer.

The Targus Laser Pen Stylus for Capacitive Devices makes it easy to take notes, draw, play games or simply turn a page. This accessory not only functions as a stylus but also features as a built-in pen and laser pointer. Featuring a durable rubber tip that won't scratch the surface of your device, this stylus allows you to type accurately and comfortably. The tip of the stylus engages directly with your electronic, touch-screen device and instantly works right out of the box. Stylus works with Capacitive Touch devices such as Tablets, iPad/iPhone, Blackberry Storm and more; Pen uses standard D1 refill and includes one additional refill.
