Key Features of LENOVO IDEAPAD FLEX 3

Please Note: The features mentioned below may vary for the model across the region. Please refer Product specifications above for the Processor, Storage, Graphics, etc in the specific model.

Designed for your on-the-go life

With up to 10 hours of battery life* and an impressive 76% screen-to-body ratio, the IdeaPad Flex 3 (11) gives you the power and real estate to take on anything. It's also slim and light, so you can take it everywhere.

*All battery life claims are approximate and based on results using the MobileMark® 2014 battery life benchmark test. Actual battery life depends on such factors as product configuration and usage, software use, wireless functionality, power management settings, and screen brightness. The maximum capacity of the battery will decrease with time and use.

One very smooth operator

Thanks to its fanless design, the IdeaPad Flex 3 (11) is surprisingly quiet. Yet, it still packs a punch to deliver the performance you need to get things done, smoothly and efficiently.

Real flexibility, real freedom

Engineered to fold 360° from laptop to tablet, the IdeaPad Flex 3 (11) gives you the flexibility to use it in different modes to best suit your needs. And with its clean, smooth lines, it won't cramp your style either.

0 to 2 hours in only 15 minutes

If you're away from home or the office and your IdeaPad Flex 3 (11) is low on power, there's no need to fret. Simply stop for a coffee, plug in your 2-in-1 laptop and in just 15 minutes, you've got another two hours.

Because your privacy counts

You'll be pleased to hear that every IdeaPad Flex 3 (11) comes with a Privacy Shutter. So, when you're finished with the webcam, you can physically close it—and keep the outside world out.
