

DELL XPS 13-7390-711P SLVC Slim Laptop - Silver

Product Specification

Intel Core i7 10510U 1.8Ghz, 16GB RAM, 1TB SSD, 13.3 Inch FHD Screen, Intel HD Graphics, Wireless, BT, Cam, FingerPrint , Windows 10 Home, Eng-Ara KB, Silver

1 Year DELL Warranty

Key Features of DELL XPS 13 Series

*Product specification within the series may vary based on model and region. Please refer product specification of the model above.

Stunning inside and out

The most powerful 13-inch in its class, remastered. Featuring the latest 10th Gen Intel® Quad Core processors, an innovative HD webcam located in the top of the InfinityEdge display and next generation Dell Cinema.

Available now in Platinum Silver with black carbon fiber interior.

Elegance in three different styles

We've redefined sophistication with our new frost or rose gold with arctic white woven glass fiber or platinum silver with black carbon fiber interior

Innovation made striking.

Progressive technology: The XPS 13 honored as a CES® 2019 Innovation Awards Honoree in the Computer Hardware and Components category.

DELL CINEMA

Dell Cinema

Cinematic experience at your fingertips with incredible colour, streaming and sound.²

The ultimate personal theater experience.

CinemaColour

Visuals appear every bit as lifelike as the world around you. Experience richer, more vibrant color and details enabled by Dell Colour Profiles and take full advantage of HDR content's superior dynamic range, infinitely deep blacks and dazzling brights thanks to Dolby Vision™. [Learn more](#)

CinemaSound

Waves MaxxAudio® Pro boosts volume and clarifies every tone, so you experience studio-quality sound. [Learn more](#)

CinemaStream

Killer™ Wireless channels maximum bandwidth to your videos or music for a seamless, stutter-free experience. [Learn more](#)

An unparalleled view

Less border, more pixels: We've improved every part of the display. Enjoy a screen that seems endless with an InfinityEdge display, enabling a 13.3" screen in an 11-inch form factor with an 80.7% screen-to-body ratio. See every detail you didn't know you were missing with stunning 4K Ultra HD resolution that packs in 8 million pixels.

Vibrant colors: By maximizing the color spectrum with 100% sRGB color and a 1500:1 contrast ratio, every shadow takes shape and even bright scenes gain definition.

Beautiful from every angle: The anti-reflective screen combined with superior 400-nit brightness frees you to enjoy your entertainment outdoors. Plus, the IPS panel provides a wider viewing angle, so you can share your screen without missing a thing.

More might, even more slight

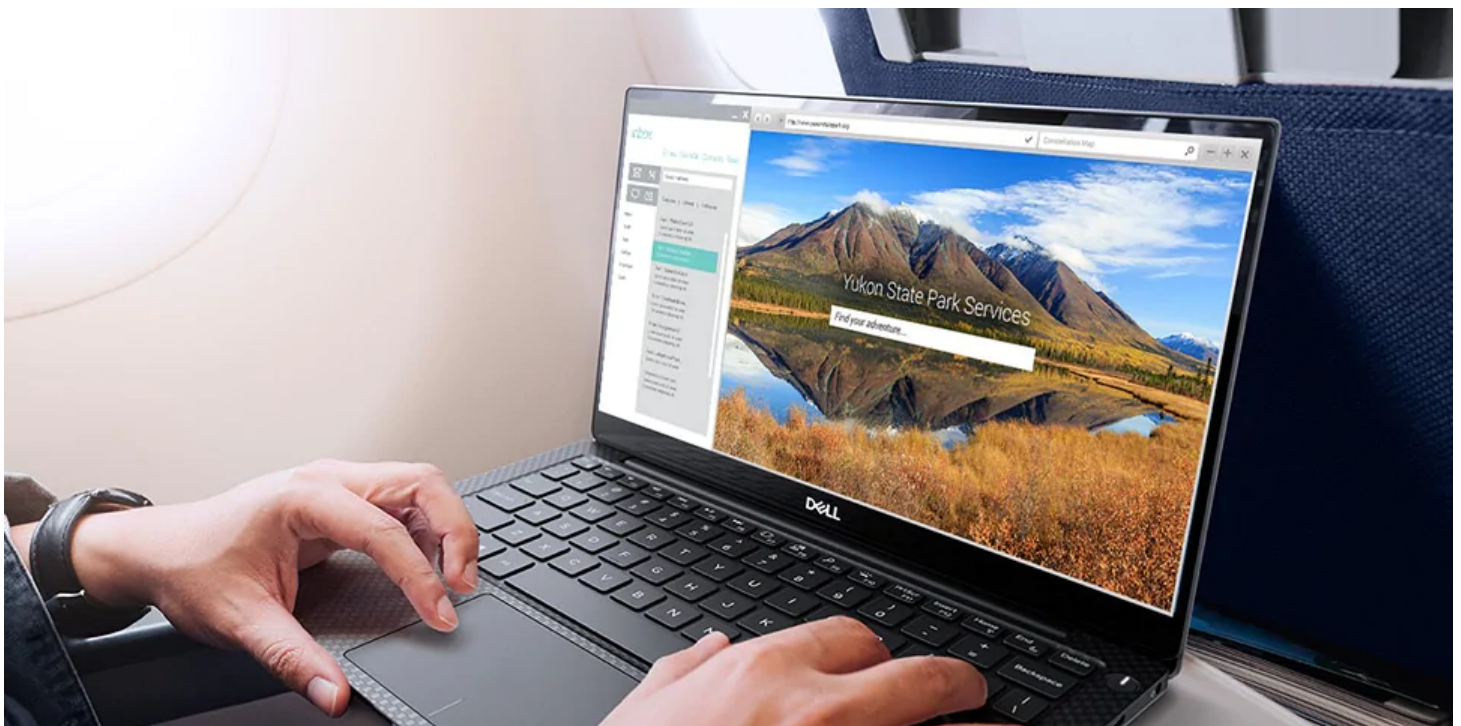

Dell's smallest 13-inch laptop: Your entertainment can go with you everywhere—starting at just 2.7 pounds, the smaller, thinner XPS 13 is ready for take-off. So perfectly sized for airplane tray tables, you won't even notice when the passenger in front of you reclines their seat.

The most powerful 13-inch laptop in its class³: With new 10th Gen Intel® Quad Core processors, more cores means increased performance, even with multiple applications running. Plus, Dell Power Manager, engineered by Dell, allows users to customize their laptop acoustics (fan speeds), temperature and performance based on their preferences between quiet, ultra-performance and cool modes. For example, quiet mode is 50% quieter than the other modes. It also dynamically delivers the maximum power from your processor while monitoring and managing system temperatures.

Work or play longer: You'll experience incredibly long battery life —up to 19 hours, 24 minutes⁴ on a Full HD model when using productivity applications like Word or Excel or up to 17 hours, 39 minutes⁵ when streaming Netflix. On our UHD panel, get up to 11 hours and 24 minutes⁶ using productivity apps or up to 10 hours and 39 minutes⁷ of Netflix streaming.

Faster memory, more storage: Your system boots and resumes in seconds thanks to up to 2TB of solid state drive storage. Multi-task in a flash even on intense applications with up to 16GB of memory.

Killer™ AX1650 built on Intel WiFi 6 Chipset: With advanced Wi-Fi 6 technology and theoretical throughput speeds of up to 2.4 Gbps, the Killer AX1650 is nearly three times as fast as the previous generation of 80MHz 2x2 AC products. It prioritizes streaming video, communication, and game traffic in your system for fast, smooth online experiences.

Scorching looks that keep their cool

Stunning strength: The XPS 13 is cut from a single block of aluminum, so it's more durable than a machine that's pieced together. Carbon fiber, inspired by the aerospace industry, and woven glass fiber of the palm rest, allow for maximum strength and minimal weight. Corning® Gorilla® Glass 4 is twice as damage resistant compared to competitive products.

Clean design: Aesthetically, less is more. So we've inlayed a stainless XPS logo, laser-etched the regulatory details and color-matched the feet for a sleeker look. The brightened platinum silver finish truly shines.

Cooler than ever: The XPS 13 is the first laptop built with GORE™ Thermal Insulation, which provides thermal conductivity levels lower than air in a thin, flexible format. While the Gore insulation directs heat out of the device, dual fans and heat pipes further lower the temperature of your XPS, enabling greater performance in a thinner form factor. [Watch Video](#)

Advanced technology made simple

You are the password: The fingerprint reader integrated into the power button lets you log on with just a touch.

Voice-activated: Your XPS 13 responds to your voice from up to 14 feet away, thanks to four built-in mics,

Microsoft® Cortana and Waves-enabled speech technology. Control playlists and access schedules regardless of background noise.

Leading-edge connectivity: The Thunderbolt™ 3 multi-use Type-C™ ports allow you to charge your laptop, connect to multiple devices (including support for up to two 4K displays) and enjoy data transfers up to 40Gbps—8 times that of a USB 3.0⁸.

Advanced docking: The XPS 13 can be used with Dell docking solutions, featuring single-cable connections for power, Ethernet, audio and video. Add the optional Dell Thunderbolt™ Dock for faster data transfers and support for up to three Full HD displays or two 4K displays.

The best, perfected

Improved camera location: We pushed innovation to its limits to create the world's smallest HD webcam (only 2.25mm) that's housed in the top of the famed InfinityEdge display—now front and center.

Revolutionary webcam construction: The new XPS 13 webcam isn't just smaller—it's also better. A new 4-element lens uses more elements than a typical webcam to deliver sharp video in all areas of the frame, while temporal noise reduction uses advanced noise reduction, significantly improving video quality, especially in dim lighting conditions. Finally, the lens is assembled with precise machinery to ensure all points of the image are in focus.

One-handed open: The new variable torque hinge design enables an easy, one-handed open. It also means your screen is more stable, even when you're in motion or using the optional touchscreen.

An icy white: We kept pushing the XPS 13 until we perfected our woven glass fiber palm rest to be a brighter-than-ever white, called arctic white.

Unite your devices with Dell Mobile Connect.

Seamless PC/smartphone integration: Access multiple devices without dividing your attention—Dell Mobile Connect pairs your iOS or Android smartphone with your laptop.

Limit disruptions: With Dell Mobile Connect, you get the option to channel notifications from phone calls, SMS, IMs and other apps right to your laptop. Keep your focus on a single screen and respond only when it's convenient for you.

Maintain your privacy: Your phone connects to your PC via Dell Mobile Connect's point-to-point, secure connection so your data is never exposed via unsecure internet connections.

*Dell Mobile Connect is not available on Windows 10 in S mode.

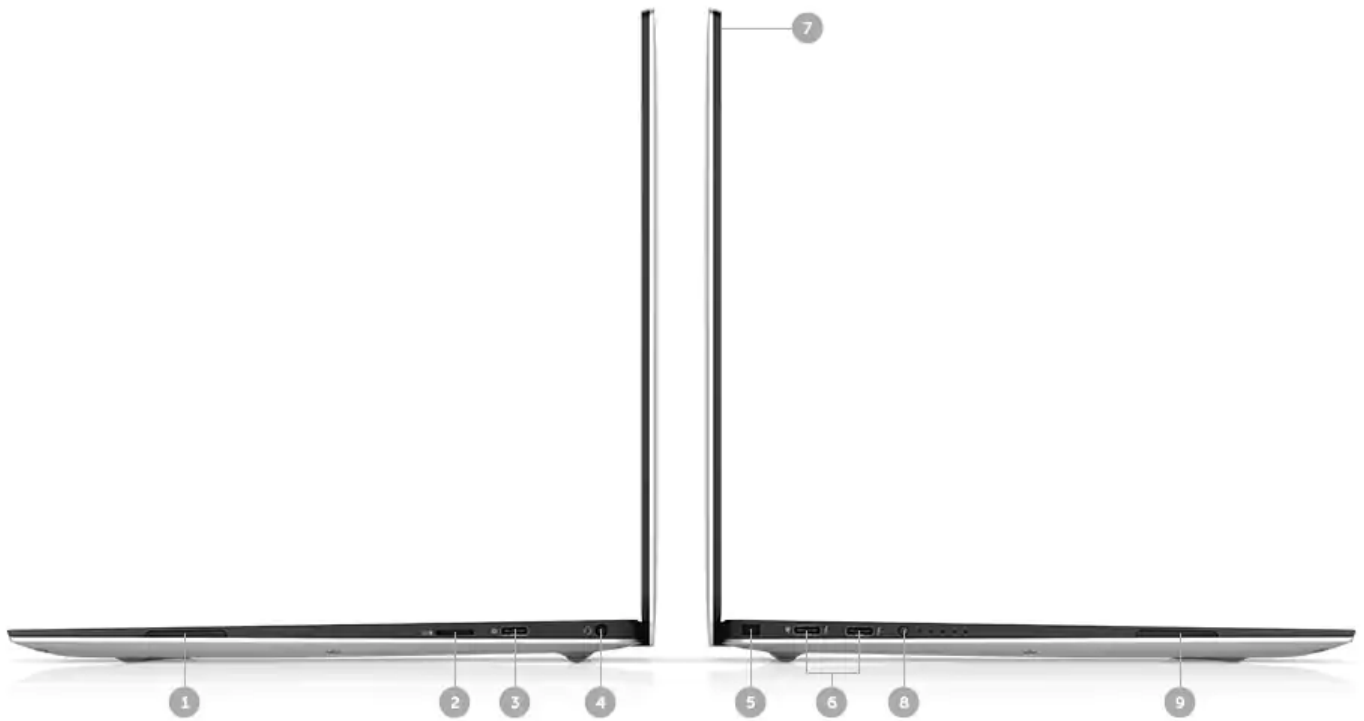

Eco-wise

Saving our seas: Recognized as a CES® 2018 Best of Innovation Awards Honoree, our black packaging trays are a step beyond recycled. 25% of the material consists of ocean plastics collected from coastal areas, while the remaining 75% is made up of other recycled plastics.

Energy efficient: XPS 13 is ENERGY STAR® certified.

Safer materials: Free of materials like cadmium, lead, mercury and some phthalates, it's also EPEAT® 2018 Bronze registered⁹ and BFR/PVC-free¹⁰.

Recycle-friendly: 90% of the laptop's parts can be easily recycled or reused, and the white bamboo packaging trays are 100% recyclable.

Ports & Slots

1. Speaker | 2. 1 MicroSD card reader | 3. 1 USB-C 3.1 with power delivery & DisplayPort | 4. Headset jack | 5. Wedge-shaped lock slot | 6. 2 Thunderbolt™ 3 with power delivery & DisplayPort (4 lanes of PCI Express Gen 3) | 7. HD camera | 8. Battery gauge indicator | 9. Speaker

Dimensions & Weight

1. Height: 7.8mm – 11.6mm (0.3"- 0.46") | 2. Width: 302mm (11.9") | 3. Depth: 199mm (7.8") | 4. Weight: Starting at 1.23 kg (2.7 lbs)¹¹
