

DELL XPS 15-7590-1608-SLVC

Product Specification

Intel Core i7 9750H 2.60Ghz, 16GB RAM, 512GB SSD, 15.6" FHD, 4GB NVIDIA Geforce GTX 1650, Wireless, Bluetooth, Camera, Fingerprint, Windows 10 Home, Eng-Arab Keyboard, Silver Color.

1 Year DELL Warranty

Features of DELL XPS 15 Series

Please Note : The features mentioned below may vary for the model across the region. Please refer Product specifications above for the Processor, Storage, Graphics, etc in the specific model.

Meet the smallest 15.6-inch performance laptop on the planet

Improved camera location: We pushed innovation to its limits to create our smallest HD webcam that's housed in the top of the famed InfinityEdge display—now front and center.

Revolutionary webcam construction: The new XPS 15 webcam isn't just smaller—it's also better. A new 4-element lens uses more elements than a typical webcam to deliver sharp video in all areas of the frame, while temporal noise reduction uses advanced noise reduction, significantly improving video quality, especially in dim lighting conditions. Finally, the lens is assembled with precise machinery to ensure all points of the image are in focus.

InfinityEdge display: The virtually borderless display maximizes screen space by accommodating a 15.6-inch display inside a laptop closer to the size of a 14-inch, thanks to a bezel measuring just 6.04mm on the sides and 7.08mm on the top.

One-of-a-kind design: Measuring in at a slim 11-17mm and starting at just 4 pounds (1.8 kg) with a solid state drive, the XPS 15 is one of the world's lightest 15-inch performance-class laptops.

Powerhouse performance

Ultimate mobile performance: The most powerful XPS laptop we've ever built includes the latest 9th gen Intel® Core™ processor with up to 8 cores and 16 threads, delivering the ultimate power for gamers and creators.

Less wait, more create: The optional NVIDIA® GeForce® GTX 1650 GPU power accelerates your favorite creative apps for greater performance and faster speed in video editing, graphic design, photography, and game

broadcasting. Supercharge your favorite games with the breakthrough graphics performance of the award-winning NVIDIA Turing™ architecture.

Maximum memory and storage: Supports up to 32GB* of memory with a bandwidth of 2666MHz, 1.2 times the speed of 2133MHz options. Faster memory means you get to the content that you need quicker. Storage up to 2TB* solid state drives, available in faster PCIe versions, provide plenty of storage room and high-performance responsiveness to access and run your applications quickly. The XPS 15 boots and resumes in seconds with a solid state drive, so you can do more without waiting.

Killer™ Wireless: Featuring advanced Wi-Fi 6 technology and theoretical throughput speeds of up to 2.4 Gbps, the Killer AX1650 is nearly 3 times as fast as the previous generation of 80MHz 2x2 AC products. The Killer 1650 automatically detects, classifies, and prioritizes streaming video, communication, and game traffic in your system for fast, smooth online experiences.

Work or play all day: You'll experience the longest battery life of any 15-inch* laptop —up to 20 ½ hours* on a Full HD model with 97Whr battery when using when using productivity applications like Word or Excel or up to 14 ½ hours* when streaming Netflix. On our UHD panel, get up to 13 hours and 22 minutes* using productivity apps or up to 9 hours and 22 minutes* of Netflix streaming and with OLED get up to 10 hours and 24 minutes* on productivity apps and up to 9 hours and 23 minutes* of Netflix streaming.

See what you've been missing

A standard backlit keyboard illuminates your keys so you can stay productive in low-light or no-light rooms while typing.

Interact intuitively

Pinch, zoom and click with confidence: The precision touch pad prevents jumping and floating cursors, while Accidental Activation Prevention puts a stop to unintentional clicks when your palm hits the touch pad.

Windows Hello: Enjoy a password-free sign-in with the optional fingerprint reader, which is integrated into the power button that gives you the fastest, most secure way to unlock your laptop. Using your finger, it recognizes you apart from all others. It waves you in with a friendly hello and even works on apps and Microsoft Edge websites.

Artfully constructed from premium materials

Maximum durability: Cut with precision from a single block of aluminum for a sturdy, durable chassis in a beautiful design. The Corning® Gorilla® Glass 4 is twice as damage resistant compared to competitive products.

Cool under pressure: The palm rest is made from carbon fiber. It's strong and thin like aluminum, but lighter and cooler to the touch.*

Ports & Slots

1. SD card slot | 2. USB 3.1 Gen 1 | 3. Battery gauge button and indicator | 4. Wedge-shaped lock slot | 5. AC power | 6. USB 3.1 Gen 1 | 7. HDMI 2.0 | 8. Thunderbolt™ 3 (4 lanes of PCI Express Gen 3) supporting: Power Delivery, Thunderbolt™ 3 (40Gbps bi-directional), USB 3.1 Gen 2 (10Gbps), Native DisplayPort 1.2 video output, VGA, HDMI, Ethernet and USB-A via Dell Adapter (sold separately) | 9. Headset jack
