

# DELL XPS 13-7390-0109-SLVC (2-in-1) Convertible Laptop - Silver

## Product Specification

Intel Core i7 1065G7 1.3Ghz, 16GB RAM, 512GB SSD, 13.4" FHD Touch N Flip, Wireless, INTEL Iris Plus Graphics, Bluetooth, Camera, Fingerprint, Windows 10 Home, Eng-Arab Keyboard, Silver Color.

1 Year DELL Warranty

## Features of DELL XPS 13 2-in-1 Convertible Series

Please Note : The features mentioned below may vary for the model across the region. Please refer Product specifications above for the Processor, Storage, Graphics, etc in the specific model.

## The future of the 2-in-1

13-inch 2-in-1 with a stunning HDR display, 10th Gen Intel® Core™ processors and up to 2.5 times more performance in a thinner frame, packaged in a luxurious design.

A harmony of design and experience

**Elevated experience:** The new XPS 13 2-in-1 blends together an exceptional user experience and beautiful design. The next gen MagLev keyboard is edge-to-edge, and 24% thinner than a standard keyboard. Additionally, you now have a 19% larger touchpad and a 7% larger 16:10 display—this elevates your experience by removing distractions and expanding what you use most.

**Revolutionary webcam construction:** The new XPS 13 webcam isn't just smaller (only 2.25 mm)—it's also better. A new 4-element lens uses more elements than a typical webcam to deliver sharp video in all areas of the frame, while temporal noise reduction uses advanced noise reduction, significantly improving video quality, especially in dim lighting conditions. Finally, the lens is assembled with precise machinery to ensure all points of the image are in focus.

**Easy to open:** The new variable torque hinge design makes it easier to open the XPS 13 2-in-1 with one hand. It also means your screen is more stable, even when you're in motion or using the touchscreen.

A vision of perfection

**Display like no other:** A stunning HDR 400 certified display enables over 16 million colours that have more depth and dimension than ever before. Plus, an optional 4K Ultra HD+ (3840 x 2400) display delivers precise detail and sharp images.

**Colour that pops:** Equipped with 90% DCI P3 colour gamut, your screen delivers saturated colours while a 1500:1 contrast ratio allows you to see the brightest brights and darkest darks. And 500-nit brightness provides more clarity in bright light like outdoors, while a 0.65% anti-reflective coating cuts the glare of a glossy screen.

**Dolby Vision™ certified:** Take full advantage of HDR content's superior dynamic range with Dolby Vision™, which can deliver colors never before seen on SDR PC displays. Dolby Vision content can deliver highlights that are up to 40 times brighter, and blacks that are up to 10 times darker.<sup>3</sup>

**Reduces harmful blue light and maintains vivid color:** Dell Eyesafe® intelligently manages light energy at the source – selectively reducing harmful blue light and dispersing it across the light spectrum. Our unique solution combines RGB hardware and software adjustments to more effectively protect against blue light, while maintaining vivid color integrity.

**The edge of innovation:** A refined InfinityEdge display debuts a 7% 16:10 display with an improved screen to body ratio, more viewing space for productivity and a mesmerizing edge-to-edge view. Additionally, this new design makes top camera placement possible.

**Take note:** The optional Dell Premium Active Pen delivers precise pressure sensitivity (4096), tilt functionality for detail shading while drawing and low lag for the most natural, accurate stylus experience. Write, draw, doodle or take notes with ease, then attach it magnetically to your 2-in-1 when you're finished.

More power comes in a thinner package

**Guaranteed power:** In addition to holding the place as our smallest 13-inch 2-in-1: this XPS has up 2.5 times more performance over the previous generation and is powered by new 10th Gen Intel® 10nm processors, in an 8% thinner form factor.

**Killer™ Wireless:** With advanced Wi-Fi 6 technology and theoretical throughput speeds of up to 2.4 Gbps, the Killer AX1650 is nearly three times as fast as the previous generation of 80MHz 2x2 AC products. It prioritizes streaming video, communication, and game traffic in your system for fast, smooth online experiences.

**Dell Power Manager with adaptive performance:** This 2-in-1 is our first system to use adaptive performance based on the latest Intel Dynamic Tuning Technology. With this new predictive and adaptive engine, our laptop is actively changing the power of its CPU to optimize your specific workload, increasing performance when you need it.

**Work or play all day:** You'll experience incredibly long battery life - up to 16 hours, 58 minutes<sup>4</sup> on a Full HD+ model when using when using productivity applications like Word or Excel or up to 10 hours, 50 minutes<sup>5</sup> when streaming Netflix. On our UHD+ panel, get up to 10 hours and 22 minutes<sup>6</sup> using productivity apps or up to 7 hours and 24 minutes<sup>7</sup> of Netflix streaming.

### Stays cool under pressure

Experience the thermal redesign of the XPS 13 2-in-1. With separated dual fans to cover more area, new internal vapor chambers and hidden exhaust venting—greater performance is enabled in the thinnest form factor possible.

### A new meaning to premium

**Stunning strength:** The XPS 13 2-in-1 is cut from a single block of aluminum, so it's more durable than a machine that's pieced together. Corning® Gorilla® Glass 5 is tough, damage resistant, durable and elegant, up to four times better on drop performance than competitive glasses. [Watch Video](#)

**Diamond cut finish:** Our designers are experts at attention to detail. Through multiple trials, your system now shows off gleaming, double-anodized side edges that achieve a flawless, polished finish and prevent scratches from connectors.

**Choose your style:** A machined aluminum platinum silver is complemented by either an arctic white or black interior. The black interior uses carbon fiber, inspired by the aerospace industry, allowing for maximum strength and minimal weight while the white interior is composed of white woven glass fiber.

**White hot:** Inspired by runway trends, the XPS 13 2-in-1 features an optional arctic white woven glass fiber palm rest developed specifically for Dell. Our design team worked tirelessly to get the details just right—carefully crafted backlighting, UV- and stain-resistant coating to prevent yellowing and staining, and coordinated packaging and accessories.

### Eco-wise

**Saving our seas:** Recognized as a CES® 2018 Best of Innovation Awards Honoree, our black packaging trays are a step beyond recycled. 25% percent of the material consists of ocean plastics collected from coastal areas, while

the remaining 75% is made up of other recycled plastics.

**Energy efficient:** The XPS 13 is ENERGY STAR® certified.

**Safer materials:** Free of materials like cadmium, lead, mercury and some phthalates, it's also EPEAT® registered and BFR/PVC-free.

**Recycle friendly:** 90% of the laptop's parts can be easily recycled or reused, and the white bamboo packaging trays are 100% recyclable.
