Vertiv SN-Z03 Specifications

SN Sensor 2 Termperature/1 Humidity Probe 5.18M/17FT Cable

At a Glance

- Integrated sensor that includes three temperature and single humidity sensors and cable
- Compatible with Vertiv MPX and MPH rack PDUs using RPC card or Vertiv Liebert IS-UNITY-DP communications card
- May be tool-lessly mounted on a Vertiv rack frame, or mounted on a rack door, rack rail, or on flat surfaces within the rack
- Features auto-configuration with no set-up required
- Operating Environment: 41°F to 131°F, 10 to 95% Relative Humidity

Overview

The Vertiv Liebert SN-Z03 integrated sensor includes three temperature and single humidity sensors and cable, spaced to read temperatures in the top, middle and bottom or a rack and to read humidity in the middle of the rack. It is designed to assist in monitoring conditions within a rack and can be placed in any area to read temperature and humidity.
