

PRODUCT OVERVIEW

TM-AG1 is a pop filter that helps to achieve cleaner vocal recordings. It consists of a dual-layer nylon screen with side air vents that effectively reduces plosives and protects the microphone from saliva. With its gooseneck clamp, it can be easily attached to the mic stand and adjusted in a variety of positions.

Features at a glance

- Reduces plosives during vocal recordings (speech or singing)
- Dual nylon screen with side air vents for efficient noise reduction
- Long gooseneck with clamp for flexible attachment and adjustment
