

## **Main features:**

### **1. 2K auto focus HD image**

It adopts high-sensitivity chip and precise lens, supports 2560\*1440 resolution, maximum frame rate is 30 frames, and can intelligently adjust frame rate and resolution according to ambient light.

Fast auto focus, can provide clear and detailed speakers even in low-light environments, with true and natural colors.

### **2. 85° wide angle, wide field of view**

85° wide-angle lens shooting, wider field of view, restore the real scene, clear without distortion.

### **3. Camera privacy protection cover**

The camera is equipped with a protective cover, which can effectively protect the privacy of your life when you use it at home, office, Internet cafes, etc., with more confidentiality and peace of mind.

### **4. Built-in omnidirectional dual noise reduction microphone**

High-sensitivity omnidirectional dual noise reduction microphone, capable of receiving about 3 meters, clear and stable calls, smooth and convenient voice communication.

### **5. Compatible with multiple systems and live broadcast platforms**

Plug and play, no software required. Compatible with mainstream computer systems and major live video platforms, playing the smart trend.

\*QQ/WeChat, etc. will automatically compress the pixel resolution of various camera devices.

### **6. 360° horizontal rotation lens**

It can be rotated 360° horizontally, and the upper and lower viewing angles can be adjusted freely within a specific angle to meet different framing compositions.

### **7. Adjustable silicone base**

The base can be adjusted to adapt to different sizes of monitors. There are multiple placement methods and multiple needs. The base is equipped with a non-slip silicone design, which prevents the camera from sliding and damage to protect the equipment from being scratched by the base.

### **8. Five-layer coated lens**

Effectively improve light transmittance and image quality, and restore true colors.

### **9. Protective magnetic ring**

Anti-interference protective magnetic ring reduces signal interference.

### **10. System requirements**

Windows 7/8/10 or higher, Mac OS X 10.6 or higher, Chrome OS and Android v5.0 or higher

### **11. Compatible software**

Skype, Zoom, Google Hangouts, Face Time for Mac, QQ, WeiXin...

\*Some software, etc. will automatically compress the pixel resolution of various camera devices.

### **12. Packing list: camera, quick start guide**
